Updated Aerosol Labelling Provisions Briefing paper

This document is intended for use as a documentation tool and FEA does not assume any liability for its content. There are still some discrepancies in the different language versions which are highlighted in the following tables as far as they are known to FEA.
If you find any further discrepancies in the legal texts or mistakes in this briefing paper, please contact Alain D'haese: alain.dhaese@aerosol.org.

Introduction

The 3rd Adaptation to Technical Progress (ATP) to the Aerosol Dispensers Directive (ADD) 75/324/EEC (Commission Directive 2013/10/EU) has been published in the Official Journal of the European Union (OJEU) on 20 March 2013.

The 4th ATP to the Classification, Labelling and Packaging (CLP) Regulation (EC) No 1272/2008 (Commission Regulation 2013/487/EU) has been published in the OJEU on 1 June 2013.

The 1st legal text aligns the labelling provisions of the ADD to the CLP Regulation. Both legal texts include new labelling provisions for aerosol dispensers.

The 5th ATP to the Classification, Labelling and Packaging (CLP) Regulation (EC) No 1272/2008 (Commission Regulation 2013/944/EU) has been published in the OJEU on 3 October 2013. It includes again Precautionary Statement P210 to delete '*Manufacturer/supplier to specify applicable ignition source(s)*' in the last column of the table.

For the transition period, please see the FEA slide *Labelling – Transition Period*.
